

FOR IMMEDIATE RELEASE

Newport Network Solutions Expands into Madison, WI to Enhance Service Capabilities

Madison, WI – March 27th, 2025 – Newport Network Solutions, a leader in network infrastructure, security, and audio-visual solutions, is excited to announce its strategic expansion into the Madison, WI market. This move strengthens Newport's ability to provide cutting-edge network cabling, security systems, and fire alarm installations to businesses, government entities, and developers across the region.

"Expanding into Madison allows us to meet growing demand for advanced network and security solutions," said Jason Berthelsen, Owner of Newport Network Solutions. "Our goal is to provide unparalleled service and support to businesses seeking reliable infrastructure and innovative security measures."

With a strong presence across Wisconsin, Newport specializes in structured cabling, video surveillance, fire alarm systems, access control, and audio-visual solutions. The new Madison office will support IT firms, general contractors, real estate developers, property managers, and businesses with tailored solutions that align with evolving technological needs.

Newport's commitment to excellence was recently demonstrated through the successful completion of a 40,000 sq. ft. facility project, delivered on schedule and under budget. As a Panduit ONE Gold Partner, Newport continues to set industry standards through precision, efficiency, and innovation.

Beyond service expansion, Newport Network Solutions will leverage its strong relationships already established in the Madison area, ensuring clients have access to the latest technology and customized solutions that enhance business operations.

"With our expanded presence in Madison, we look forward to building long-lasting relationships and contributing to the technological growth of local businesses," added Berthelsen. The Madison office underscores Newport Network Solutions' dedication to providing reliable, top-tier infrastructure and security solutions that foster a secure and efficient business environment.
